EDUCATION

Pamantasan ng Lungsod ng Valenzuela Present
BS Information Technology

PROJECTS

LikHub, co-founder and developer 2026
PHP, MySQL, JavaScript

- Started a site for student artists with a classmate. I wrote the code and my co-founder did the design.
- Three parts: free drawing lessons, a gallery, and a commission page with artist profiles and prices.
- Email verification, password reset, and a tracker so the buyer and artist both see where a commission is.

Kabakal Fitness Equipment, online shop and admin system 2026
PHP (PDO), MySQL, no framework

- Customers order gym equipment and upload a GCash screenshot; the admin checks it and confirms the order.
- Stock is held as "reserved" until payment is verified so items don't get oversold. Partial payments show what's still owed.
- Sales dashboard and data export for the store's records.

Portfolio website 2026
PHP, MySQL, JavaScript

- Built from scratch. I can add or edit work from an admin page instead of changing the code, and contact form messages go to an inbox.

MicroMML, Figma app design (group of 3) 2026

- 17 screens for a small business app: invoices, expenses, loans and marketing.

CERTIFICATES

CodeSignal: Journey into SQL Nov 2026
CodeSignal: Intro to Data Analysis with Python Apr 2026

SKILLS

Web: PHP, MySQL, JavaScript, HTML, CSS

Data: SQL, Python

Design: Photoshop, Illustrator, Premiere Pro, Figma, Canva

Networking: Cisco Packet Tracer

Other: photography, video editing
